

BlockChain

in the Shipping Industry

BIPC 2018

Hyundai Merchant Marine, Co. Ltd.,

Kyung-In Jung , Head of IT Strategy Office

Contents

- 1** Understanding Block Chain Technology
: What is Block Chain Technology?
- 2** Block Chain Technology in the Shipping Industry
: Why Block Chain is useful in the Shipping Industry?
- 3** Global Trend of adopting Block Chain
in the Shipping Industry
: Brief history and trend of adopting Blockchain
in the Shipping Industry
- 4** Upcoming impact of Block Chain Technology
in the Shipping Industry

1 Understanding Block Chain Technology

Gartner

Top 10 Strategic Technology Trends for 2019

“Blockchain’s business value-add will grow to slightly over **\$360 billion** by **2026**, then surge to more than **\$3.1 trillion** by **2030**”

Autonomous Things

Augmented Analytics

AI-Driven Development

Block chain

Smart Spaces

Digital Twin

Empowered Edge

Immersive Experience

Quantum Computing

Privacy & Ethics

Blockchain
in the Shipping Industry

1 Understanding Block Chain Technology

Block chain is a **Ledger** that maintains a continuously growing list of data records or transactions

clay tablets

papyrus

tally sticks

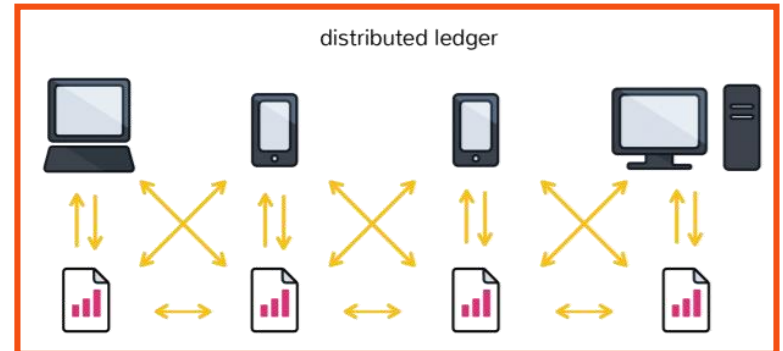

double entry book keeping

spreadsheets

distributed ledger

1 Understanding Block Chain Technology

Block chain is a **Ledger** that maintains a continuously growing list of data records or transactions – What is different with Blockchain

Physical Transaction

Using a **Physical** Token (or Money) for Transaction

Simple but will be limited **by distance/time**

Digital Transaction

Transaction can not be the same way
As we are sending an e-mail or attachment

Money (Token) **Should not be copied**
Or used several times

Digital Transaction: Ledger

Digital Transaction enabled by
Trusted 3rd Party who records and manage
All the Transaction

What if you can not trust the third party??

1 Understanding Block Chain Technology

Shared / Decentralized **Ledger** replaces requirement of trusted 3rd party, which is vulnerable to hack or cyber attacks

Decentralized Ledger

Distribute the Ledger to all the trusted Parties, share and decentralize trust.

Now every one holding a copy of the Same digital ledger.

Shared Ledger

Secured

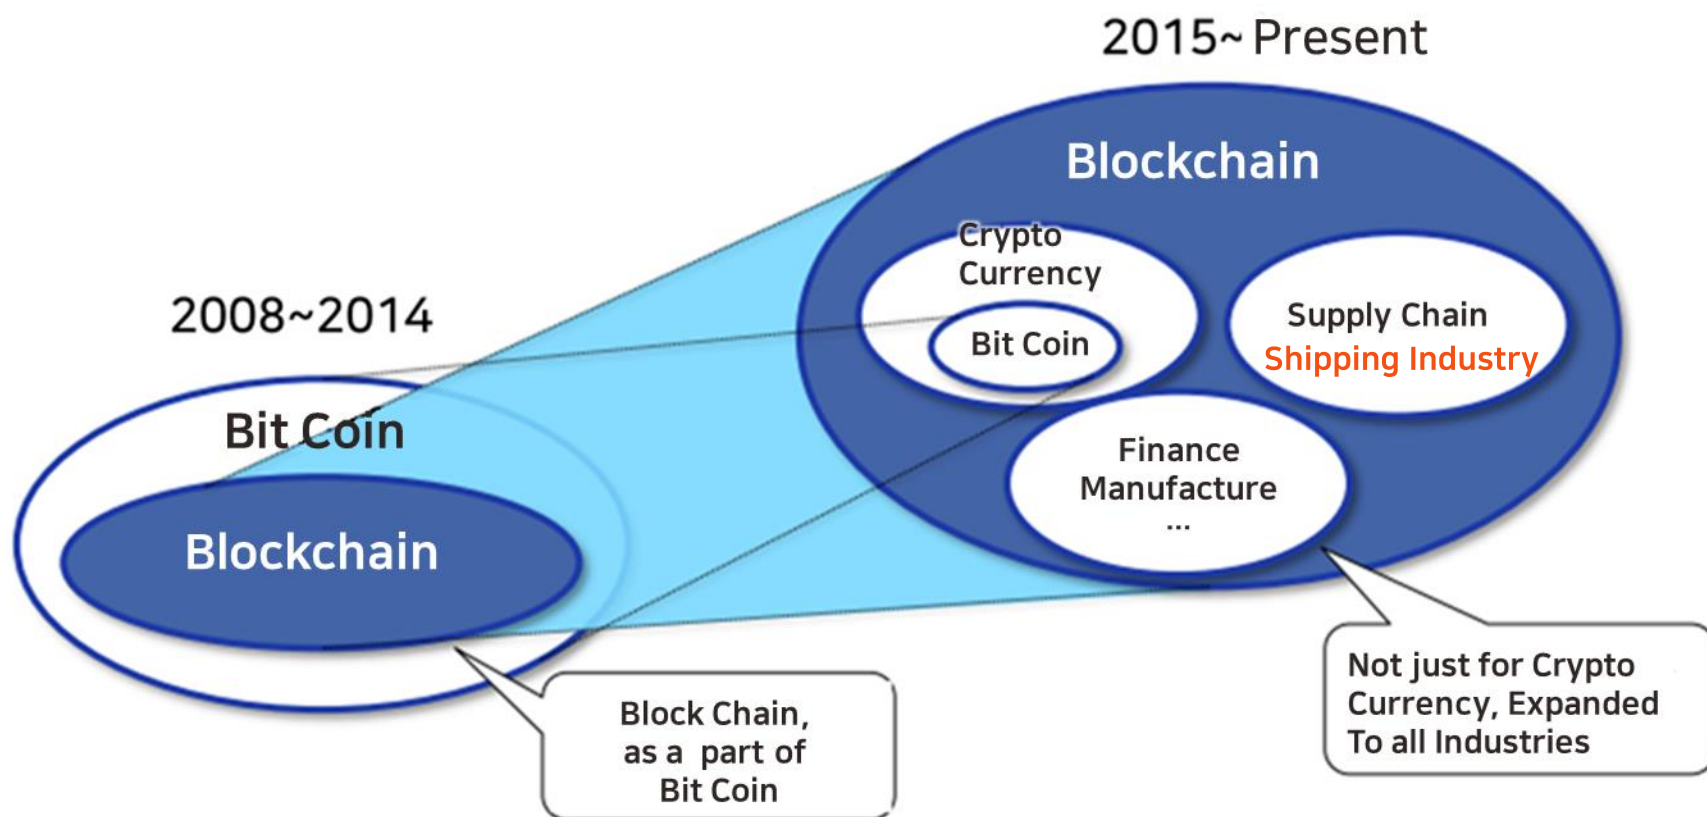

Trusted

Automation
(Smart Contract)

2 Block Chain Technology in the Shipping Industry

Since 2008 of its beginning, Blockchain expanded to cover various industries Including Shipping Industry.

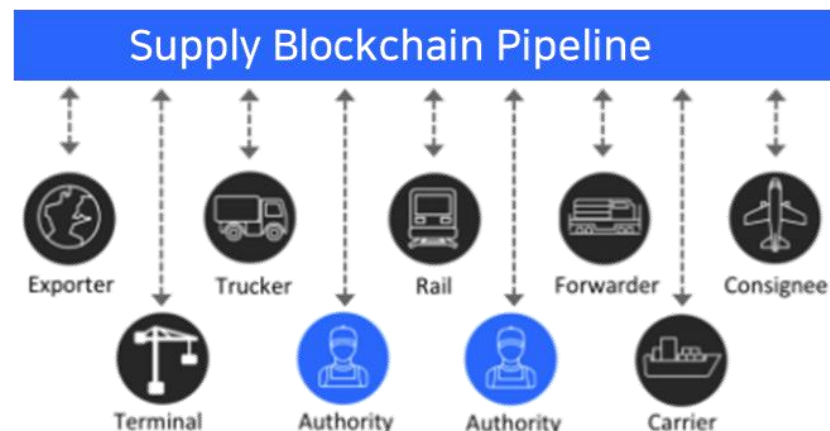

2 Block Chain Technology in the Shipping Industry

Block chain technology will bring more transparency and efficiency to Shipping Industry

- Dependent to Massive Document Work (Paper Either Electronic Document)
- Lack of Consistency, Complex work
- Risk of insufficient information, fraud issues
- Administrative cost of handling Manual Document Jobs

- Shared / Distributed Ledger will be working as a Single Pipeline of all required information
- End to End visibility with trusted / verified information
- Manual cumbersome jobs can be replaced with Smart Contract (Automation)

3 Global Trend of adopting BlockChain Technology in the Shipping Industry

From 2016 Maersk-IBM Block Chain Pilot, Various kind of PoC and Test projects Been carried out by B2B/B2G Sectors in Shipping Industry

Blockchain projects in the Shipping Industry

● B2B ● B2B & B2G ● B2G

3 Global Trend of adopting BlockChain Technology in the Shipping Industry

South Korea's shipping logistics companies, government shipping arms like the Oceans, Fisheries, and the Customs, alongside major ocean liners Participated And performed PoCs in 2017

2017. May
Launch

2017. Aug~Sep
PoC 1st Stage

2017. Oct.~Dec.
PoC 2nd Stage

2017. Dec
Final Report

3 Global Trend of adopting BlockChain Technology in the Shipping Industry

Concept of PoCs
Performed by Blockchain Consortium

TEST Process (Documents)

PoC
1st Stage

Shipping
Documents

- Booking Request
- Booking Confirmation
- Inland Transportation
- Shipping Instruction
- Bill of Lading
- Customs Clearance
- Container Terminal Gate In/Out
- Container Tracking using IoT Devices

PoC
2nd Stage

Added
Trade Finance

- Open Account
- NEGO
- Settlement
- Insurance Policy

2017. May
Launch

2017. Aug~Sep
PoC 1st Stage

2017. Oct.~Dec.
PoC 2nd Stage

2017. Dec
Final Report

Blockchain
in the Shipping Industry

3 Global Trend of adopting BlockChain Technology in the Shipping Industry

Ministry of Science and ICT of Korea supporting 6 Blockchain research projects in 2018. and will invest over \$200 mil. Into blockchain by 2022

Management of livestock records

information of livestock from their breeding, then shipping and sales.

Electronic document distributions between countries

Document/Certifications can be shared between countries

Online voting

Improve reliability in online voting, With transparent vote counting

Customs clearance

Replace current customs clearance process and sharing Documents with Blockchain

Easy real estate transaction

Register information can be easily shared to required party (Govt, Bank) for faster transaction

Shipping logistics

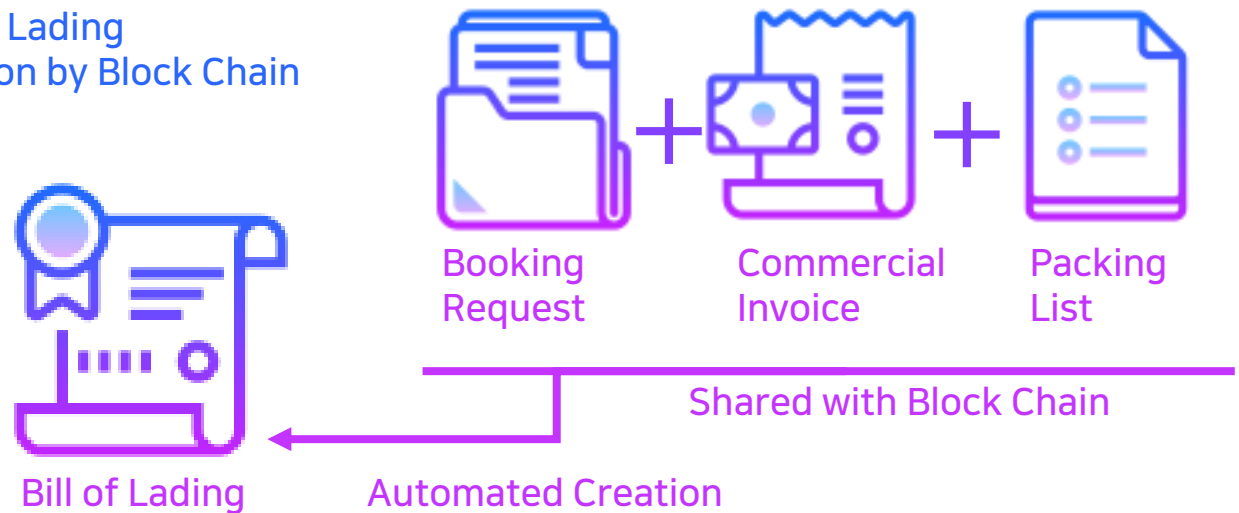

ITT (Inter Terminal Transportation) process based on blockchain

3 Global Trend of adopting BlockChain Technology in the Shipping Industry

PoC Proved Possibility of Improving work efficiency by automated Document creation with shared data on the Block Chain Pipe line

Automated Issuance of Bill of Lading
With Shared Data / Information by Block Chain

65%~75%
of Bill of Lading
Data / Items (Components)
Can be reused
from Prior Documents
Shared by Block Chain

Standardization of document and work procedure required
For further progress of automated process.

4 Upcoming impact of Block Chain Technology in the Shipping Industry

Block Chain will bring disruptive change in the Shipping Industry,
But there are more things to consider

Types of Blockchain Biz Model

End to End Blockchain Platform

Providing End-To-End Document Visibility through out supply chain

Limited Scope (Business Specific)

Trying to apply blockchain technology to specific business process or business model

Based on Blockchain Unique feature

Focused to Unique features of blockchain such as crypto token (by start-ups)

Requirements / Key Factors

Participants

Legal / Regulation

Standard

Affiliation

Governance

Integration

Robust Biz Model

Integration with
Existing Process / System

Uniqueness

Keen understanding of
Blockchain

4 Upcoming impact of Block Chain Technology in the Shipping Industry

Block Chain will bring disruptive change in the Shipping Industry,
But there are more things to consider

Gartner

Through 2018, 85% of projects with “blockchain” in their titles will deliver business value without actually using a blockchain

It's Difficult to Build a Business Model,
Based on the Unique Features of Block Chain Technology

Need Capabilities / Readiness for New Business and Paradigms
to successfully adopt Block chain technology

End of Document
