

Sustainable Port Development and Government Policy for Enhancement of PPP

2018. 11. 2

- **JoongWoo LEE, Professor**
- **Civil Engineering, KMOU**
- **President, KINPR**

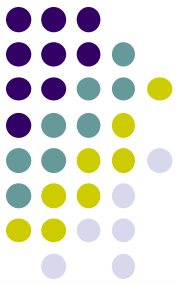

- ❖ Analysis of Overseas Development Environment
- ❖ Sustainable Port Development
- ❖ Direction for Overseas Development Cooperation
- ❖ Government Overseas Port Development Policy
- ❖ Summary

❖ Analysis of Overseas Development Environment

1 Analysis of International Environment

• Starting System for Sustainable Development

- *Adopted 2030 UN Agenda for Sustainable Development*
- *17 SDGs Sustainable Development Goals with 169 targets*
Check risks and opportunities

The
INTERNET
Of **THINGS**

• Expansion of Development Level & Dimension

- *Existing UN MDGs UN Millennium Development Goals: Social Development*
- *UN SDGs : Social Development + Economy Development*
+ Preservation of Environment
- *New Tools & Issues → IOT, Big Data, Interconnectivity-Block Chain*

• Various Development Funds & Resources

- *Increased Demand for Development Funds : Developing countries,*
Climate change, Energy deficit
- *Importance & function of ODA, inducing private participation*
- *Assistance effectiveness → Development effectiveness (PPP)*

❖ Analysis of Overseas Development Environment

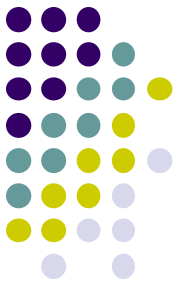

2 Analysis of Domestic Environment

- **Diversified Participation Pattern for ODA for Port & Logistic Projects**
 - *Private sector : Increasing NGO Assistance, Private approach to market of developing country with social duty*
 - *Dominant trend of increase ODA participation both CG and LG*
- **Arrived Limit to ODA Resources**
 - *Stagnation of Economy growth ratio*
 - *Limit on National & Local Finance (-)*
 - *Pressure from Welfare Finance : support for vulnerable social group & youth employment*
- **Request on Effectiveness & Transparency**
 - *Stagnant Public Support on Increase of ODA*
 - *Strong interest on ODA and Domestic financial pressure : Strengthen Effectiveness & Transparency of ODA*

❖ Sustainable Port Development

1 What is a Sustainable Development?

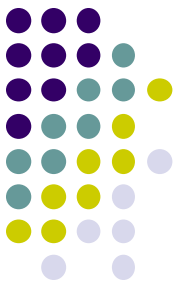

Wrong! → Development only considers the needs of present generations without compromising the ability of future generations to meet their own needs

*Development = Improve human's life
Economic growth linked with income +
Enhance Social benefits (health, education, environment)*

Leave possibility of development for the next generation

Find complementary measures considering short-long term impacts

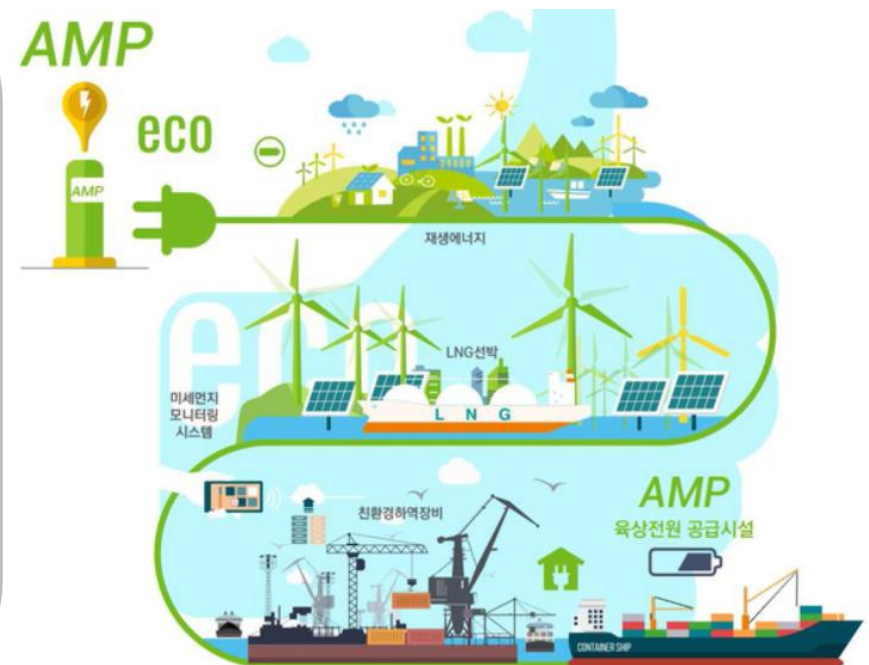

❖ Sustainable Port Development

2 Environmental Impacts due to Port Development

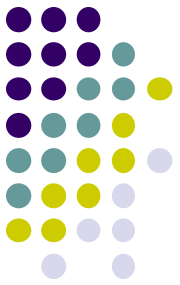

➤ **Environmental Factors** to be considered in relation to Port Development are categorized into 9 groups

- 1) *Water Quality*
- 2) *Coastal Hydrology*
- 3) *Bottom Contamination*
- 4) *Marine and Coastal Ecology*
- 5) *Air Quality*
- 6) *Noise and Vibration*
- 7) *Waste Management*
- 8) *Visual Quality*
- 9) *Socio-Cultural Impacts*

Source: KMI

❖ Sustainable Port Development

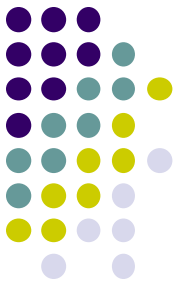

2 Environmental Impacts due to Port Development

Annex VI of MARPOL

- 2020 *IMO regulations to reduce air pollution from maritime sector, port & shipping industries (MARPOL ANNEX VI - 73rd MEPC)*

❖ Sustainable Port Development

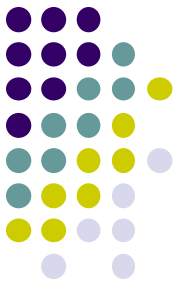

3 Environmentally Sound Port Development

➤ Problem of Environment caused by Port Development

- *Development in terms of cargo handling capability (meet demand)*
 - *insufficient formation of integral port region/port-urban: no harmony*
 - *restricted space : guard, surveillance purpose*
 - / *lack of understanding on waterfront*
- *Trend for advanced port plan*
 - *logistics + ocean cultural region*
 - remodel port structure as integrated space*
 - *near port (relative industrial region, distribution region)*
 - / *split port (resident green region, core urban region)*

❖ Direction for Overseas Development Cooperation

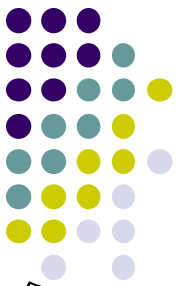

1 Strengthening Partnership

➤ Strengthening Partnership for Port Construction Project

- Setup PPP (Public-Private Partnership) *(eg. PPP project in India)*
 - connect private sector and government of developing country
 - activate partnership with **high quality & valued private sector**
- Participate to port development project & plan and coordinate
 - strong relationship to maximize the end result
 - assist on port master plan, feasibility & sustainability study, construction project management & operation
- Leave chances to domestic construction & engineering companies
 - government involved in the first stage of project activation

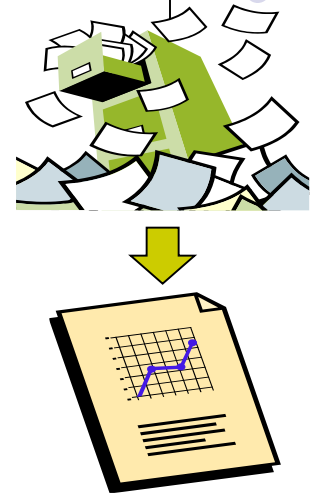

❖ Direction for Overseas Development Cooperation

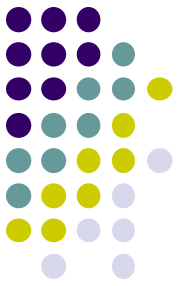

2 Risk and Outcome Management

➤ Management Convergence

- *Enhancing quality of feasibility study*
 - *investigate project background*
 - *figure out local economy & social impact*
 - *check sustainability of policy & finance procurement*
 - *risk analysis – SWOT, contingency plan*
- *Implementation of trustworthy partner for overseas PPP business*
 - *link feasibility study with the main project*
 - *information sharing platform for port & logistic infrastructure development*
- *Control of project bottlenecks*
 - *break down barriers*
 - *simplify permission & administrative procedures*
 - *support working level consultation & training*

❖ Direction for Overseas Development Cooperation

3 Responsibility

➤ Responsibility and Collaboration on Project

- *Social responsibility*

- *became a business imperative, not an optional*
- *see it as an opportunity*

- *Operation of Development Action Program (DAP)*

- *trade off between economic value and social-environmental value*
Remind sustainable development !

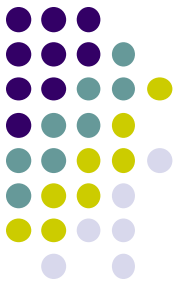

- *win-win effect by business matching & linking BPP*
Business Partnership with Private sector

- *Collaborate with potential global partners*

- *help to prepare financing & legislation (eg, PPP law)*

❖ Government Overseas Port Development Policy

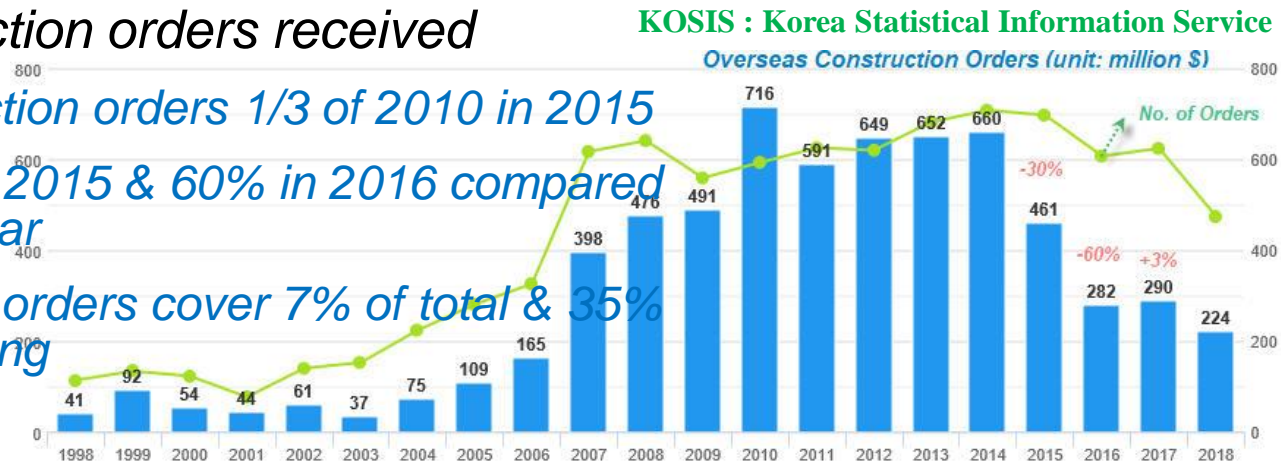

1 Trend of Port Construction Market

➤ Domestic

• Value of construction orders received

- reduced construction orders 1/3 of 2010 in 2015
- 30% reduction in 2015 & 60% in 2016 compared with previous year
- port construction orders cover 7% of total & 35% of civil engineering

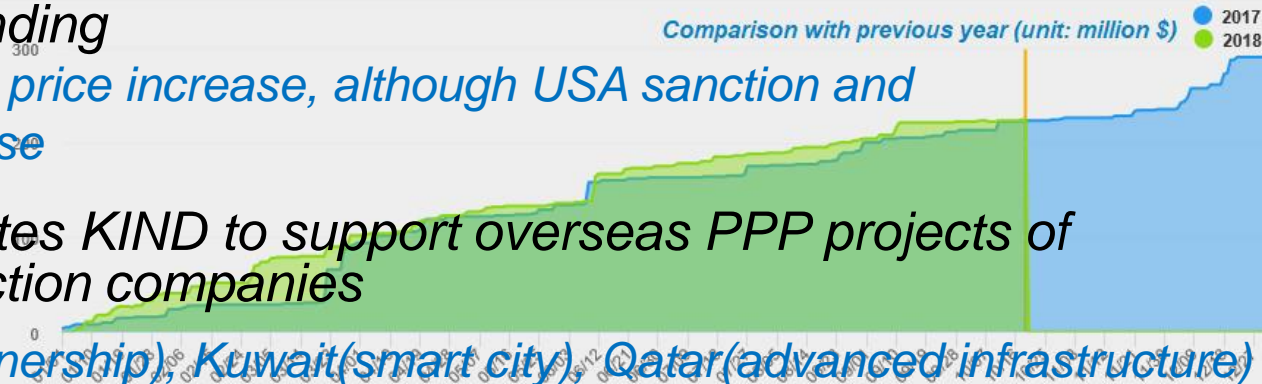

➤ Overseas

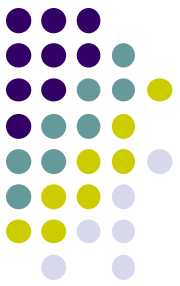

• ME order is expanding

- with the help of oil price increase, although USA sanction and base rate increase

• Government initiates KIND to support overseas PPP projects of domestic construction companies

- UAE(strategic partnership), Kuwait(smar city) Qatar(advanced infrastructure)

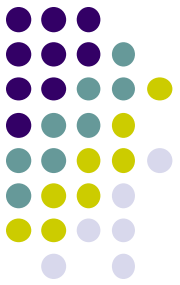

2 Status of Cooperative Overseas Port Development

- *Government started cooperative overseas port development project since 2008 but none of overseas expansion through private investment business*

Initial Needs - Project Management - (FS-Final Design-Supply-Construction) - Trial&Monitoring - Operation&Management (All in one Package!!)

Background	<ul style="list-style-type: none"> ▪ Shrink domestic port construction market ▪ Necessity of expansion to overseas market ▪ Discover new growth engine for port industry 	Status	<ul style="list-style-type: none"> ▪ '08~'18 : 29 countries, 30 projects Request of country concerned 4 International cooperation 2 Overseas port construction coordination 3 Government proposal 2 Private request 1
Contents	<ul style="list-style-type: none"> ▪ Free support for port master plan and FS ▪ Design support fit for environment of country concerned ▪ Preparedness for support of overseas marketing and financing of private sector ▪ Management of port development and operation training program for both junior and senior governmental officials 	Problems	<ul style="list-style-type: none"> ▪ Drop of reliability for project cost estimation due to difficulties of getting field & ground survey data ▪ Different opinions from port planners of countries ▪ Processing international bidding after overseas cooperative project ▪ Uncertain will of client government for carrying forward the port project (lack of budget) ▪ No reflection on national port development policy ▪ Low interest due to deficient reliability on project outcome ▪ Absence of PPP law in country concerned

❖ Government Overseas Port Development Policy

3 Benchmarking

➤ Trends and Complementary measures

- *Eliminate overlapped mission and over competition*
 - *looking for integration of construction business, financial institutions, and coordination of function*
 - *strengthening business ability for marketing, prospective development, and management of leading customer*
 - *setup outcome indicator & feedback performance measurement of construction projects*
- *Complement of our government*
 - *Overseas Construction Promotion Act → KIND*
 - *Organizing integrated coordinator and lending weight & operating IDP*

Value of construction orders, consultation, & satisfaction

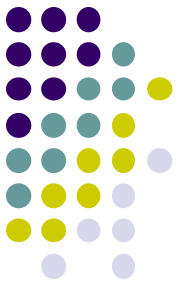

IBRD
ADB
AIIB
IDB
MDB

KOICA

❖ Government Overseas Port Development Policy

4 Competitiveness for Driving Development Project

Financing Competitiveness

- longer repayment period & low interest from the point of recipient country
- *fund scale* able to drive big project
- government strategy & contents for *financing support*

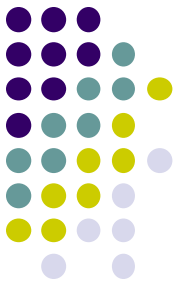

Understanding Local Standard & Practice

- understanding *nation's institution* might be bottleneck to driving port infrastructure project
- competitiveness of construction cost understanding execution of construction environment & market stability, and quality *standards*

Optimum Construction Cost Estimation

- proper estimation of construction cost at the stage of FS
- participation of construction company as port developer & investor to *hedge project risk*
- project proposition with a package of management & operation knowhow

➤ Overseas Port Development Environment

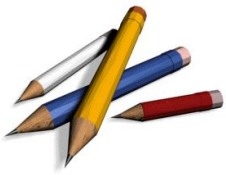

- Sustainable development & PPP project assistance
- Faces growth limit in overseas construction market
- Chance with world class technology and experience for port project
- *engineering, construction, management, and operation*

➤ Sustainable Port Development

- Environmentally sound development
- Find complementary measures considering short-long term impacts

➤ Government Overseas Port Development Policy

- Strengthening partnership and responsibility for port project
- Setup complementary measures for *collaboration*
- Convergence of *risk and performance management* → *opportunity*
- Understand local standard & *share* management-operation knowhow
- Estimate optimum construction cost together with *public-private participation*

Cooperative Development of Port & Logistics Infrastructure

THANK YOU!
